

The 4 dams kill over 50% of juvenile salmon. Breaching would save about 10 million salmon.

95% of the electricity produced is surplus, thus it doesn't need to be replaced.

Breaching the earthen berms of the dams and to mitigate for potential loss to farmers, will cost about \$700 million.

The Executive Branch of Government has full authority and discretion to breach the dams, because they are losing money.

Breach the dams on the Lower Snake River to save millions of tax dollars, bring wealth & jobs to the region, restore salmon runs, & increase orca prey!

BIDEN, BREACH NOW!
